Declaration of Conformity

Part 15 FCC Rules

This device complies with Part 15 of the FCC Rules. Operation is subject to the following three conditions:

- This device may not cause harmful interference
- This device must accept any interference received, including interference that may cause undesired operation.
- The distance between user and products should be no less than 20cm

Note: This equipment has been tested and found to comply with the limits of a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy, and if not installed and used in accordance with the instructions, may cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Note: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications to this equipment. Such modifications could void the user's authority to operate this equipment.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

CE

Manufacturer: Flyingvoice Network Technology Co., Ltd.

Address: Room 207~209, 2/F, Bldg B52#, Zhongchuang Industrial park, Liuxian Avenue, Taoyuan Street, Nanshan District, Shenzhen

Hereby, Flyingvoice Network Technology Co., Ltd. declares that this device is in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU

A copy of the declaration of conformity can be obtained with this user manual; this product is not restricted in the EU.

The wireless operation frequency

WiFi: 2412MHz-2472MHz, Max EIRP Power 19.36dBm

Safety Warning and Attentions

If use adapter, adapter must be comply 2014/30/EU Directive

Adapter Caution: Adapter shall be installed near the equipment and shall be easily accessible.

Do not store or use your product in temperatures higher than 50°C

RF Exposure Statement

The distance between user and products should be no less than 20cm

GNU GPL INFORMATION

Flyingvoice phone firmware contains third-party software under the GNU General Public License (GPL). Flyingvoice uses software under the specific terms of the GPL. Please refer to the GPL for the exact terms and conditions of the license.

The original GPL license, source code of components licensed under GPL and used in Flyingvoice products can be downloaded online:

About This Guide

Thank you for choosing Flyingvoice FIP10/FIP10P IP phones, which deliver the industry's leading HD audio quality and a wide range of business telephony features, such as Call Hold, Call Transfer, Busy Lamp Field, Call Recording, Paging and Conference over an IP network. Meanwhile, it features a compact appearance, robust performance and cost efficiency for daily desktop voice communications.

This guide provides everything you need to quickly use your new phone. Firstly, verify with your system administrator that the IP network is ready for phone configuration. Also be sure to read the Quick Start Guide which can be found in your phone package before you set up and use the IP phone. As you read this guide, keep in mind that some features are configurable by your system administrator or determined by your phone environment. As a result, some features may not be enabled or may operate differently on your phone. Additionally, the examples and graphics in this guide may not directly reflect what is displayed or is available on your phone screen.

FIP10/FIP10P Hardware

NO.	Item	Description
1	Handset	Handset to pick up and answer call
2	Phone Screen	Shows information about your phone, such as calls, messages, soft keys, time and date
3	Line Keys	Access your phone lines and features
4	Soft Keys	Access the function displayed on the screen above the soft keys. The soft keys change depending on what you are doing at the time
5	Menu Key	Enter Menu
6	Contact	Phone book shortcut
7	MESSAGE Key	Accesses voice mails
8	Paging Key	Paging
9	HOLD Key	Places a call on hold or resumes a held call
10	Recorder Key	Record the voice when talking
11	Navigation Keys	Scroll through information or options displayed on the screen. Access History and Directory respectively.
11	OK Key	Confirms actions or answers incoming calls.
12	Mute Key	Toggles and indicates the mute feature. The key LED glows red when the call is muted.
13	Headset Key	Toggles and indicates the headset mode. The key LED glows green when headset mode is activated
14	Conference Key	Join the Conference call
15	Transfer Key	Transfers a call to another party
16	Volume Key	Adjusts the volume of the handset, headset, and speaker
17	Redial Key	Redials a previously dialed number

18	Speakerphone Key	Toggles and indicates the hands-free (speakerphone) mode. The key LED glows green when the hands-free (speakerphone) mode is activated
19	Keypad	Provides the digits and special characters in context-sensitive applications
20	Power LED Indicator	Indicates call status, message status, and phone's system status
21	Logo	FLYINGVOICE Logo

Power LED Indicator

The power LED indicator indicates the call, message and phone's system status.

LED Status	Description
Solid red	The phone is initializing
Fast-flashing red (0.3s)	The phone is ringing
Slowly-flashing red (1s)	The phone receives a voice mail or text message
Solid red for 0.5s and off for 3s alternately	The phone enters the power-saving mode

Line Key LED

The line key LED indicators are associated with the status of phone lines and features.

Line key LED (associated with the phone line)

LED Status	Description
Solid green	The line is seized
Fast-flashing red	The line receives an incoming call
Red	The line is in conversation
Off	The line is inactive

Screen and Icons

The user screens and icon indicators can help you navigate and understand the important information on the phone's status.

Placing Calls

You can use your phone like a regular phone to place calls in many ways easily.

Topics

[Placing a Call from the Dialer](#)

[Placing Multiple Calls](#)

[Redialing a Number](#)

[Placing a Call from the Call History](#)

[Placing a Call from the Directory](#)

Placing a Call from the Dialer

The Dialer enables you to enter a number to place a call, and it displays a list of previously placed calls or contacts in your directory.

You can also select the desired contact from the search list, the placed call list or Directory.

Note Your system administrator can configure the source list for searching and disable to display the placed call records.

Procedure

1. Do one of the following:

- Start typing a phone number.
- Select the desired line key.
- Pick up the handset, press the Speakerphone key  or the HEADSET key .

2. Enter a number or select a contact.

3. Select **Send**.

Note Your system administrator can enable live dialpad feature, which enables your phone

to automatically dial out the phone number after a period of time without selecting **Send**.

Placing Multiple Calls

When you are in a call, you can hold your current call and place a new call.

Procedure

1. Do one of the following:
 - Select a line key. The active call is placed on hold.
 - Press the HOLD key or **Hold** to place the original call on hold.
2. Enter the desired number or select a contact.
3. Select **Send**.

Note During a call, you can press the Speed Dial key to select a transfer mode. Check with your system administrator to find out if this feature is available on the phone.

Redialing a Number

The phone keeps a record of all the placed calls. You can recall the contact you recently called.

Procedure

1. Press the RD key.

*A record of **Placed Calls** is displayed on the phone screen.*

Tip: Press the RD key twice to recall the contact you called.

Placing a Call from the Call History

You can place calls to contacts from the History list, which contains the calls that were recently placed, answered, missed, or forwarded.

Procedure

1. Press **History**.
The phone screen displays all call records.
2. Select the desired call list.
3. Highlight a contact and select **Send**.

Placing a Call from the Directory

You can place a call to a contact directly from your directory.

Procedure

1. Select **Dir** or navigate to **Menu > Directory > Local Contacts**.
2. Select the desired contact group or **All Contacts**.
3. Highlight the desired contact and select **Send**.

If the selected contact has multiple numbers, highlight the desired number, and select **Send**.

Answering Calls

When you receive a call, you can choose to answer it manually or automatically.

Topics

[Answering a Call](#)

[Answering a Call When in a Call](#)

[Answering a Call Automatically](#)

Answering a Call

When you receive an incoming call, the phone rings and the screen displays the information of the incoming call. You can choose to answer the incoming call.

Procedure

1. Do one of the following:

- Pick up the handset.
- Press the Speakerphone key .
- Press the HEADSET key.
- Press **Answer** or the line key that has the flashing green LED indicator.

The call is answered in the speakerphone (hands-free) mode by default.

Answering a Call When in a Call

You can answer a call when there is already an active call on your phone.

When you are in an active call and an incoming call arrives on the phone, a call waiting tone beeps, and the incoming call information is displayed.

Procedure

1. Select **Answer**.

The active call is placed on hold, and the incoming call becomes active.

Note You can disable the call waiting feature to reject the incoming call automatically during a call.

Answering a Call Automatically

Auto answer enables you to automatically answer an incoming call in speakerphone (hands-free) mode when your phone is idle.

Note When you are in an active call and an incoming call arrives on the phone, the incoming call will not be automatically answered even if the auto answer is enabled.

Your system administrator can configure the phone to automatically answer the incoming call after ending all calls.

Procedure

1. Navigate to **Menu > Features > Auto Answer**.
2. Enable the **Auto Answer**.
3. Select **Save**.

Switching Among the Handset, Speakerphone and Headset Modes

You can select the desired mode before placing a call or can alternate among Speakerphone, headset, and handset modes during a call.

When using the headset, the LED indicator glows green.

Procedure

1. During the call, pick up the handset, press the Speakerphone key , or press the HEADSET key.

For example, if you're using the handset, press the HEADSET key to switch to the headset, or press the Speakerphone key  to switch to the speakerphone.

Note Your system administrator can disable you to use the handset, speakerphone (Hands-free) or headset mode.

Disabling Call Waiting

If the call waiting feature is disabled, when there is already a call, the new incoming call will be rejected automatically.

Before You Begin

Check with your system administrator if the call waiting off code is required. If required, get it from your system administrator.

Procedure

1. Navigate to **Menu > Features > Call Waiting**.
2. Select **Disabled** from the **Call Waiting** field.
3. Select **Save**.

Silencing or Rejecting Incoming Calls

When you receive an incoming call, you can choose to silence or reject the call instead of answering.

Rejecting Calls with Do Not Disturb (DND)

You can enable DND to reject all incoming calls automatically when you do not want to be interrupted.

Note Check with your system administrator to find out if the DND feature is available on your phone.

Topics

[Rejecting Calls with DND](#)

[Deactivating DND](#)

Rejecting Calls with DND

Procedure

1. Navigate to **Menu > Features > DND**.
2. Select **Enable** from the **DND Status** field.
3. Select **Save**.

The DND icon appears in the status bar.

Tip: To activate or deactivate DND quickly, press the DND soft key when the phone is idle.

Deactivating DND

You can deactivate DND when you are ready to resume receiving calls again.

Procedure

1. Navigate to **Menu > Features > DND**.
2. Select **Disable** from the DND Status field.
3. Select **Save**.

The DND icon disappears from the status bar.

Tip: To deactivate DND quickly, press the **DND** soft key when the phone is idle.

Ending Calls

You can end the current call at any time.

Procedure

1. Do one of the following:

- If you are using the handset, press the **Cancel** key or hang up the handset.
- If you are using the headset, press the **Cancel** key.
- If you are using the speakerphone, press the **Cancel** key, Speakerphone key .

Muting/Unmuting Audio

When you are in a call, you can mute the audio, so that you can hear the other person, but they cannot hear you.

Procedure

1. Press the MUTE key during a call.
2. Press the MUTE key again to unmute the call.

Holding and Resuming Calls

You can place an active call on hold and resume the call when you are ready. When you place a call on hold, the held party may hear the music played by its sever.

Topics

[Holding a Call](#)

[Resuming a Held Call](#)

Holding a Call

You can place an active call on hold on your phone.

Procedure

1. Press the HOLD key or **Hold** during a call.

The phone ignores engaged audio device (handset or headset) and plays beep in the Speakerphone (hands-free) mode by default.

Note When you have multiple calls on the phone and the current call is held, you can press the corresponding line key to swap to the active call.

Resuming a Held Call

You can view and resume a held call on the phone.

Procedure

1. Press the HOLD key again, corresponding line key or **Resume**.

If multiple calls are placed on hold, select the desired call first.

Note When you have multiple calls on the phone and the current call is active, you can select **Swap** to swap to the held call.

Redirecting Incoming Calls

When you are not available to answer calls on your phone, you can forward the calls to another phone.

Topics

[Forwarding All Incoming Calls to a Contact](#)

[Forwarding All Incoming Calls on All Lines](#)

[Deactivating Call Forward](#)

[Diverting Calls to a Contact](#)

Forwarding All Incoming Calls to a Contact

You can set up the forwarding type which enables your phone to forward all incoming calls to a contact. There are three types of forwarding:

Always Forward: Forwards all incoming calls immediately.

Busy Forward: Forwards incoming calls when you are busy in a call.

No Answer Forward: Forwards incoming calls when no one answers the calls.

Forwarding All Incoming Calls on All Lines

You can forward all incoming calls on the phone.

Before You Begin

Check with your system administrator if the forward on code or off code is required. If required, get it from your system administrator.

Procedure

1. Navigate to **Menu > Features > Call Forward**.
2. Select the desired forwarding type and select **Enabled** from the corresponding field.
3. Enter the contact number you want to forward incoming calls to in the **Forward to** field.
4. If you select the **No Answer Forward** option, select the desired ring time to wait before

forwarding from the **s** field.

5. Optional: Enter the always/busy/no answer forward on code or off code respectively in the **On Code** or **Off Code** field.

6. Select **Save**.

The call forward icon appears in the status bar.

Deactivating Call Forward

You can deactivate call forward when you no longer want to forward your calls.

Procedure

1. Navigate to **Menu > Features > Call Forward**.
2. Select the desired forwarding type and select **Disabled** from the corresponding field.
3. Select **Save**.

Diverting Calls to a Contact

You can divert all incoming calls from a particular contact to another contact. Auto divert has precedence over call forward.

Procedure

1. Select **Directory (Dir)** or navigate to **Menu > Directory > Local Contacts**.
2. Select the desired contact group or Local Contacts.
3. Highlight the desired contact, and select **Option > Detail**.
4. Edit the contact information.
5. Enter a contact's number you want to divert the call to in the Auto Divert field.
6. Select **Save**.

Transferring Calls

During a call, you can transfer the call to another contact. You can use one of three ways:

- **Blind Transfer:** Transfer a call directly to the third party without consulting.
- **Attended Transfer (Consultative Transfer):** Transfer a call with prior consulting.

Topics

[Performing a Blind Transfer](#)

[Performing Transfer with a Transfer Key](#)

Performing a Blind Transfer

You can transfer a call to another contact immediately without consulting with her/him first.

Procedure

1. Press the TRAN key or **XFER** during a call.
2. Do one of the following:
 - Enter the number or select a contact from the placed call list you want to transfer to.
 - If you have set a Speed Dial key, you can also press the Speed Dial key to transfer the

call to the contact directly.

- Press **Directory (Dir)**. Select the desired contact from the Directory list.

3. Press B Tran to complete the transfer.

TIP: If you are using a handset, the transfer can be completed by hanging up the handset.

Performing Transfer with a Transfer Key

By default, you can transfer a call to a specific contact directly using a Transfer key during a call.

Your system administrator can also set your phone to perform attended transfer when using a Transfer key.

Performing a Blind Transfer Using a Transfer Key

After you have set a Transfer key with a specific contact, you can perform a blind transfer by using it.

Before You Begin

Confirm with your system administrator that the transfer mode has set to perform a blind transfer.

Procedure

1. Press the Transfer key during a call.

The call is transferred to the specific contact directly.

Conference Calls

The phone supports a three-way local conference and multi-way network conference.

During the conference, follow these tips:

- Use the handset or a headset if you're in an open environment.
- Mute your microphone when you are not speaking, especially in noisy environments.
- Avoid tapping or rustling papers near the microphone.
- Speak in your normal voice without shouting.

Note Check with your system administrator to find out if the local conference is enabled on your phone.

Topics

[Setting Up a Local Conference Call](#)

[Holding or Resuming a Conference Call](#)

[Splitting a Conference Call](#)

[Ending a Conference Call](#)

Setting Up a Local Conference Call

You can set up a local conference call with up to two contacts.

Procedure

1. Place a call to the first party.

2. When the first party answers the call, select **Conference (Conf)** to place a new call.

The active call is placed on hold.

3. Dial the second party's number.

You can also select the desired contact from the search list, or select a contact from the placed call list or Directory before you enter the number.

4. When the second party answers the call, press **Conference (Conf)** again.

Holding or Resuming a Conference Call

When you place a conference call on hold, other participants cannot hear each other until you resume the held conference call.

Procedure

1. Press the HOLD key or **Hold** to place the conference on hold.

2. Press the HOLD key again or **Resume** to resume the held conference call.

Splitting a Conference Call

You can split the conference call into individual calls. After the split, the conference call ends, and other parties are held.

Procedure

1. Select **Split**.

Ending a Conference Call

When you end the conference call, the other parties drop the call.

However, the system administrator can set up your phone so that the other two parties remain connected when you end the conference call.

Procedure

1. Select **End Call (EndCall)**.

Advanced Call Features

You can perform some server-dependent tasks on the phone. Contact your system administrator to find out if your phone supports these advanced call features.

Voice Mail

Voice Mail feature allows you to leave voice mails for someone or listen to your voice mail messages on your IP phones.

This feature is set up on the server-side and not all servers support this feature.

Topics

[Leaving Voice Mails](#)

[Listening to Voice Mails](#)

Leaving Voice Mails

You can leave a voice mail to someone who is busy or inconvenient to answer the call.

Procedure

1. Follow the voice prompts to leave a voice mail.
2. Hang up to complete the voice mail.

Listening to Voice Mails

You can listen to your voice mails on the phone, to obtain voice information sent by a contact.

Before You Begin

You need to set the voice mail code in advance.

Procedure

1. Navigate to **Menu > Message > Voice Mail > View Voice Mail**.

The phone screen displays the amount of new and old voice mails.

2. Highlight an account, and then select **Connect**.
3. Follow the voice prompt to listen to your voice mails.

Tip: When the phone prompts that the phone receives a new voice mail, you can press the MESSAGE key or **Connect** soft key to dial out the voice mail access code directly.

Directory

The phone provides several types of phone directories, which can be customized by your system administrator.

Topics

[Deleting a Contact](#)

[Deleting All Contacts](#)

Adding Contacts

When you add a contact to your Local Directory, you can choose how much information you want to enter for your contact. You are required to enter a contact name at least for each new contact.

Procedure

1. Select **Dir** or navigate to **Menu > Directory > Local Contacts**.
2. Select the desired contact group or **All Contacts**.
3. Select **Add**.
4. Enter your contact's information.
5. Select the desired account from the **Account** field.
6. Select **Save**.

Viewing Contacts

You can view the local contacts from the Local Directory on your phone.

Procedure

1. Select **Dir** or navigate to **Menu > Directory > Local Contacts**.
2. Select the desired contact group or **All Contacts**.

The contact names are displayed in alphabetical order.

Editing Contacts

You can update your contacts' information.

Procedure

1. Select **Dir** or navigate to **Menu > Directory > Local Contacts**.
2. Select the desired contact group or **All Contacts**.
3. Highlight the desired contact, and select **Option > Detail**.
4. Edit the contact information.
5. Select **Save**.

Deleting a Contact

You can delete any contact from the Local Directory.

Procedure

1. Select **Dir** or navigate to **Menu > Directory > Local Contacts**.
2. Select the desired contact group or **All Contacts**.
3. Highlight the desired contact, and select **Option > Delete**.

The phone prompts you whether to delete the contact.

4. Select **OK**.

Note If the contact added to the Favorites directory is deleted in the Local Directory, it will be automatically deleted from the Favorites directory.

Deleting All Contacts

You can delete all contacts from the Local Directory.

Procedure

1. Select **Dir** or navigate to **Menu > Directory > Local Contacts**.
2. Select the desired contact group or **All Contacts**.
3. Select **Option > Delete All**.

The phone prompts you whether to delete all contacts.

4. Select **OK**.

Note If the contact added to the Favorites directory is deleted in the Local Directory, it will be automatically deleted from the Favorites directory.

Moving a Local Directory Contact to Blacklist

You can move a contact in the Local Directory to blacklist. Incoming calls from this contact will be rejected automatically.

Procedure

1. Select **Dir** or navigate to **Menu > Directory > Local Contacts**.
2. Select the desired contact group or **All Contacts**.
3. Highlight the desired contact, and select **Option > Add to Blacklist**.

The phone prompts you whether to move to the blacklist.

4. Select **OK**.

Searching for Contacts

In the Local Directory, you can enter search criteria to find your desired contact quickly.

Procedure

1. Select **Dir** or navigate to **Menu > Directory > Local Contacts**.
2. Select **Search**.
3. Enter your search criteria in the search field.

Blacklist

Incoming calls from the Blacklist are rejected automatically. You can store up to 30 contacts

in the blacklist to block unwanted callers.

Customizing Your Phone

You can make your phone more personalized by customizing various settings.

Topics

[Changing the Administrator Password](#)

[Changing the Backlight and Time](#)

[Changing the Language](#)

[Time & Date](#)

Changing the Administrator Password

By default, you require an administrator password to access the **Advanced/Advanced Settings** menu. The default password is "admin". For security reasons, you should change the default password as soon as possible.

Note If you do not change the default password, the phone displays a warning icon in the status bar.

Procedure

1. Navigate to **Menu > Advanced > Change Password**.
2. Select **Menu Password** Enter your old and new password information.
3. Select **OK**.

Changing the Backlight and Time

You can change the brightness of the phone screen during phone activity and inactivity. The brightness automatically changes after the phone has been idle for a specified time.

You can change the screen backlight and time in the following settings:

Backlight Time: The delay time to change the brightness of the phone screen when the phone is inactive. Backlight time includes the following settings:

- **Always On:** Backlight is on permanently.
- **15s, 30s, 1min, 2min, 5min, 10min or 30min:** Backlight is changed when the phone is inactive after the designated time.

Procedure

1. Navigate to **Menu > Basic > Display > Backlight Time**.
2. Select the desired time from the **Backlight Time** field.
3. Select **Save**.

Changing the Language

Your phone supports several languages that you can choose to use on the phone.

Contact your system administrator to find out exactly which languages are supported on your phone.

Procedure

1. Navigate to **Menu > Basic > Language**.

2. Select the desired language.
3. Select **Save**.

The phone language is changed to the selected one.

Time & Date

You can set the time and date manually. The time and date formats are also variable.

Topics

[Setting the Time and Date Manually](#)

[Changing the Time and Date Format](#)

Setting the Time and Date Manually

If your phone cannot obtain the time and date automatically, you can set it manually.

Procedure

1. Navigate to **Menu > Basic > Time & Date > Manual Settings**.
2. Select the Manual from the **General** field.
3. Edit the date and time.
4. Select **OK**.

The time and date set on the phone will be changed accordingly.

Changing the Time and Date Format

You can set the phone to display the time in 12-hour format or 24-hour format. You can also change the date format, including the options to display the day (D), month (M), and year (Y).

Note Your system administrator can customize the date format.

Procedure

1. Navigate to **Menu > Basic > Time & Date > Time Format**.
2. Select the desired time format.
3. Select **OK**.

Audio Settings

You can change the basic audio settings on your phone.

Topics

[Adjusting the Volume](#)

[Setting the Ring Tone](#)

Adjusting the Volume

You can adjust the volume of the ringer, media, and the audio during a call.

Procedure

1. Press the **Volume** key to adjust the volume.

Setting the Ring Tone

You can set distinctive ring tones for groups or contacts in your Local Directory so that you can identify the caller when your phone rings.

The ring tones are used according to this priority: Contact ring tone>Group ring tone>Account ring tone >Phone ring tone.

Topics

[Setting a Ring Tone for the Phone](#)

[Setting a Ring Tone for a Contact](#)

Setting a Ring Tone for the Phone

You can choose a ring tone for all incoming calls.

Procedure

1. Navigate to **Menu > Basic> Ring Tones >Type**.
2. Select the desired ring tone.
3. Select **OK**.

Setting a Ring Tone for a Group

You can select a unique ring tone for various groups in your Local Directory.

Note You can only set a ring tone for a group that is added manually.

Procedure

1. Select **Dir** or navigate to **Menu > Directory> Local Contacts**.
2. Highlight the desired group.
3. Select **Option > Detail**.
4. Select the desired ring tone from the **Ring Type** field.

If a specific ring tone is selected, this group uses the ring tone according to the priority: Contact ring tone>Group ring tone.

5. Select **Save**.

Setting a Ring Tone for a Contact

You can select a unique ring tone for various contacts in your Local Directory. This helps you quickly identify callers according to the ring tones.

Procedure

1. Select **Dir** or navigate to **Menu > Directory> Local Contacts**.
2. Select the desired contact group or **All Contacts**.
3. Highlight the desired contact, and select **Option > Detail**.
4. Select the desired ring tone from the **Ring Type** field.
5. Select **Save**.

Wireless Network

You can connect the phones to a wireless network if Wi-Fi is available within the area. For more information, contact your system administrator.

Topics

[Activating the Wi-Fi Mode](#)

[Connecting to the Wireless Network](#)

[Viewing the Wireless Network Information](#)

[Disconnecting the Wireless Network Connection](#)

[Deactivating the Wi-Fi Mode](#)

Activating the Wi-Fi Mode

You can activate the Wi-Fi mode to connect your phone to an available wireless network.

Procedure

1. Navigate to **Menu > Basic > Wi-Fi**.
2. Select **On** from the **Wi-Fi** field.
3. Select **OK**.

The phone scans the available wireless networks in your area.

Connecting to the Wireless Network

After you have activated the Wi-Fi mode, you can connect the phone to the wireless network.

Connecting to an Available Wireless Network Manually

When you enable the Wi-Fi mode, the phone automatically connects to the saved wireless network, you can also connect it manually.

Before You Begin

Get the password of the wireless network from your system administrator. Make sure that the Wi-Fi mode is activated.

Procedure

1. Navigate to **Menu > Basic > Wi-Fi**.
2. Highlight the **Available Network(s)** and select **Enter**.
(X represents the number of available networks)
3. Optional: To research the available network, select **Scan**.
4. Highlight the desired wireless network and select **Connect**.
5. If the network is secure, enter its password.
6. Select **OK**.

Viewing the Wireless Network Information

You can view the wireless network information (for example, Profile Name, SSID or Signal Strength) when the Wi-Fi mode is activated.

Procedure

1. Navigate to **Menu > Basic > Wi-Fi > Available Network(s)**

(X represents the number of available networks).

2. Select **Detail** to view the detailed wireless network information.

If the phone is connected to a wireless network successfully, you can also navigate to

Menu > Basic > Wi-Fi > Wi-Fi Status to view the connected wireless network information.

Disconnecting the Wireless Network Connection

When you no longer want to connect to the current wireless network, you can disconnect it.

Procedure

1. Navigate to **Menu > Basic > Wi-Fi**.

2. Select **Available Network(s)**.

3. Highlight the connected wireless network, and select **Discon**.

Tip: You can also disconnect the wireless network when deactivating the Wi-Fi mode.

Deactivating the Wi-Fi Mode

You should deactivate the Wi-Fi mode when you need to connect your phone to the wired network.

Procedure

1. Navigate to **Menu > Basic > Wi-Fi**.

2. Select **Off** from the **Wi-Fi** field.

3. Select **OK**.

Maintaining Your Phone

When your phone is unable to operate properly, you need to investigate or troubleshoot issues along with other tasks your system administrator may ask you to perform.

Topics

[Rebooting Your Phone](#)

[Resetting to Factory Settings](#)

Rebooting Your Phone

The improper operation may cause malfunction. If the malfunction occurs, your system administrator may ask you to reboot your phone.

Procedure

1. Navigate to **Menu > Basic > Reboot**.

The phone prompts you whether to reboot the phone.

2. Select **OK**.

Tip: You can also long press the Cancel key on the keypad when the phone is idle to reboot the phone.

Resetting to Factory Settings

When some issues occur on your phone and you have tried all troubleshooting suggestions but still do not solve the problem, you can reset your phone to factory configurations.

This operation will delete all your personal configuration settings, and reset all settings to the factory defaults. Check with your system administrator if the personalized settings are kept before resetting your phone to factory settings.

Procedure

1. Navigate to **Menu > Advanced** (default password: admin) > **Reset to Factory Settings**.

2. Select **Reset to Factory Settings > Reset**.

The phone prompts you whether to reset the setting.

3. Select **OK**.

The phone begins resetting.

Note Reset of your phone may take a few minutes. Do not power off until the phone has started up successfully.
